EXISTING BUILDINGS COMMITTEE

Benchmarking Towards Energy Efficiency: Creating a Sustainable Energy Action Plan

Committee Leaders:

Co-Chair: Daniele Horton

Co-Chair: Kevin Devine

Research Coordinator: Seth Strongin

Communications Coordinator: Anamika Sharma

Events Coordinator: Sara Hickman

Benchmarking is an important action step to improve a building's energy performance. Developing an energy action plan or policy based upon ENERGY STAR methodology identifies opportunities requiring no capital investment.

Please join the Existing Buildings (EB) Committee to hear from Daryl DeJean, President of Emerging Technologies Associates speak on this important topic.

Daryl has twenty plus years in facility and energy management. He consults to Fortune 500 companies and for several of California's Utility Companies. He is involved in identifying, assessing and validating the technology as well as assisting in the transfer to a utility program.

Daryl is an active national speaker on energy efficiency technologies, for numerous Subcommittees on Sustainability. His courses have received national publication on an ENERGY STAR webinar hosted by the EPA.

Date: Thursday, September 27th, 2012

Time: 12:00-1:30 pm

Speaker: Daryl DeJean, President of Emerging Technologies Associates, Inc.

Location: 333 South Hope Street, Los Angeles, CA 90015

RSVP: at this [Link](#)

Parking: Free Parking with provided validation.
